- 5. In the Middle East, the Soviet Union plans to draw off Western strength by small-scale conflicts in that area.
- 6. In East Germany, Communist control is still weak, a fact which threatens the Soviet Union with a grave security problem in the event of war. Only by the end of 1951 can a neutral attitude on the part of East Germans be assured.
- 7. In the field of nuclear weapons, the Soviet Union has made progress but is still mort of United States achievements.
- 8. The Soviet Union must, above all, concentrate fully on the preparation for total war, but in view of all the factors outlined above, she cannot face war now. Hence the Soviet Union must embark on a temporizing program, using every means in the United Nations Organization and by diplomacy to encourage conferences purporting to seek a general peace. This program of conciliation is a change in tactics only. Meanwhile the Soviet Union will whittle away United States strength through localized conflicts in the Middle East and in Southern Asia.
